This year's Pantheo meeting will focus on the difficult issue of complications in a variety of ophthalmic procedures. This will include both surgical and medical procedures. Speakers from a wide range of specialties will share their experiences and views on the management and prevention of complications. Human nature and physiology is such that we can never hope to completely rid ourselves of the unexpected, but we can endeavour to minimise the risk to our patients by learning from our mistakes and sharing that knowledge. We hope you can join us and take the opportunity to bring to the meeting your own views and strategies for dealing with difficult issues in day to day practice. As always the social aspect of the meeting will play an equally important role in bringing people together and making the whole experience memorable. We look forward to seeing you in Cyprus.

**On behalf of the organising committee
*Theodoros Potamitis***

Preliminary program and main topics

Friday afternoon 27th April

**Registration opens
